October 29, 2009

Dear Rebecca,

I am writing to thank you again for all you did for me during my MFA. I am so glad that I took your theater class my first summer, as you introduced me to many concepts and ways of looking at things that have been fruitful in my choreography and art-making. I also will always be grateful for the interest that you took in my work, and all the time you spent helping me to both hone and develop my ideas, including eventually being a member of my thesis committee! I feel proud of the thesis work I created, both of the product and process -- it was meaningful to me personally, emotionally, and artistically, and I know that I would not have pushed myself to take on such an ambitious work without your encouragement. Please keep me in mind as you develop future projects -- I got so much out of the theater/somatics workshop you hosted last May, and would love to be involved in other things you're working on.

Stay in touch and all the best!

Kate
