Mr. Melancholy is a comic play that explores solitude and companionship. If you were stranded on a remote island, who would you choose for a companion: Gilligan, a volleyball named Wilson, or a runaway clown in a suitcase? In *Mr. Melancholy*, three hermits live in a lighthouse—without a light—and blissfully collect the wreckage of ships that crash on their island's treacherous rocks. Then a clown and a mysterious package wash ashore and everything changes. Don't miss the US premiere of an exquisite piece of theater by award-winning Australian playwright Matt Cameron.
